FOR IMMEDIATE RELEASE

AIS Network, LLC Receives SOC 1 Type II Attestation Report

Independent Audit Verifies AIS Network's Internal Controls and Processes

Inverness, IL – June 13, 2012– AIS Network, a fully managed hosting service system, today announced that it has completed its semi-annual SOC 1 (Service Organization Control) Type II audit. This certification attestation verifies that AIS Network has the proper internal controls and processes in place to deliver high quality services to its clients.

KirkpatrickPrice, a licensed CPA firm, performed the audit and appropriate testing of AIS Network's controls that may affect its clients' financial statements. In accordance with SSAE 16 (Statement on Standards for Attestation Engagements), the SOC 1 Type II audit report includes AIS Network's description of controls as well as the detailed testing of its controls over a minimum six-month period. AIS Network completed its SOC 1 audit in May 2012.

"AIS Network has taken considerable care in designing its systems for the highest levels of security, reliability and scalability, including developing a comprehensive set of security measures and practices to keep our customers' data protected and safe," said AIS Network CEO Jay Atkinson. "We are pleased that our SOC 1 report shows that AIS Network has appropriate controls in place around security and availability to help mitigate risks and ensure that our clients' data are highly secure," said Atkinson.

"Many of the AIS Network clients rely on their systems to process or store sensitive data," said Joseph Kirkpatrick, Managing Partner with KirkpatrickPrice. "As a result, AIS Network has implemented best practice controls demanded by their customers to address Information Security risks. Our third-party opinion validates these controls and the tests we perform provide assurance regarding the managed solutions provided by AIS Network."

SOC 1 Type II is a reporting on the controls at a service organization that was established by the American Institute of Certified Public Accountants (AICPA). This report is in compliance with the SSAE 16 auditing standards which focus on the controls of a service organization that are relevant to an audit of a user entity's financial statements. The standard demonstrates that an organization has adequate controls and processes in place. Federal regulations such as Sarbanes-Oxley, Gramm-Leach-Bliley and the Health Insurance Profitability and Accountability Act (HIPAA) require corporations to audit the internal controls of their suppliers, including those that provide technology services.

About AIS Network, LLC

AIS provides its customers with managed hosting (dedicated and virtual), cloud hosting, disaster recovery, and professional services. The AIS Network team delivers mission-critical confidence by maintaining strategic alliances with Microsoft, Cisco, and others, enabling AIS to provide IT professional services that, with the support of a seasoned team of technical experts, help clients spot and tackle strategic initiatives.
